EXAMINER'S AMENDMENT

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Inna Shestul on 06/17/2011. Applicant agreed to amend the claims to refer to a "reference waveform signal" for better consistency with the language of the specification, and Applicant agreed to cancel certain claims that were covering duplicate subject matter based on the amendments to claim 1 and to update the dependencies of claims that depended from them.

The application has been amended as follows:

In claim 1, line 12, --waveform—was inserted before "signal".

Claim 6 was cancelled.

In claim 8, line 1, "6" was changed to -1--.

In claim 8, line 2, --further-- was inserted before "selects".

Claim 9 was cancelled.

In claim 10, line 2, "6" was changed to -1--.

In claim 11, line 2, "6" was changed to -1--.

In claim 12, line 2, "6" was changed to -1--.

In claim 13, line 13, --waveform—was inserted before "signal".

In claim 14, line 8, --waveform—was inserted before "signal".

In claim 14, line 9, --waveform—was inserted before "signal".

In claim 19, line 2, --further-- was inserted before "selects".

2. The following is an examiner's statement of reasons for allowance: Maki et al. (USPN 2004/0171919) discloses a device for measuring changes in hemoglobin concentrations associated with activities of the cerebral function of an infant or subject prone to movement during measurement. It removes and reduces any influences of body movements by performing comparison to determine whether the signal is a noise signal or not based on comparing the signal with the predetermined threshold value. The prior art do not disclose or suggest performing the comparison based on correlation values between component signals and a predetermined reference waveform signal that represents a characteristic of living body reaction of the examined object, in combination with the other claim steps or elements.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
